PROFESSIONAL SUMMARY

IT operations, technical support, and security professional with 7+ years of experience supporting enterprise users and workplace technology across IT coordination, endpoint management, service desk support, and cybersecurity. Hands-on experience with Jamf Pro/Jamf Now, macOS and iOS device management, Google Workspace, Microsoft 365, endpoint protection, network/VPN troubleshooting, ticket and escalation handling, onboarding/offboarding, and security controls. Has led IT workstreams, coordinated technical tasks, mentored colleagues, supported audit readiness, and contributed to technology migrations and post-acquisition IT integration.

CORE SKILLS & TOOLS

IT Operations & Service Delivery	Day-to-day IT operations; end-user support; incident and ticket lifecycle; queue prioritization; SLA-focused service; escalation handling; root-cause troubleshooting; knowledge-base and support documentation; user communications.
Team Leadership & Coordination	Task delegation; technical guidance; peer mentoring and floor support; onboarding support for new staff; cross-functional coordination; prioritization and follow-through; stakeholder updates.
Apple & Endpoint Management	Jamf Pro and Jamf Now; macOS and iOS/iPadOS support; endpoint enrollment and configuration; configuration profiles; application deployment; patching; device compliance; Apple device troubleshooting; endpoint fleet support.
Enterprise Platforms & Identity	Google Workspace administration; Microsoft 365/O365; Slack Enterprise; Active Directory; user lifecycle management; onboarding/offboarding; access permissions; SSO and application integrations; 1Password.
Service Management & Assets	ServiceNow and ticketing workflows; incident categorization and tracking; queue management; SLA awareness; asset management and inventory coordination; hardware/software troubleshooting; vendor and repair handoffs.
Networking & Connectivity	FortiGate 80E; UniFi switches and access points; PPSK wireless; DNS/DHCP; VPN management; NordLayer; Zscaler; remote access; LAN/Wi-Fi troubleshooting; network security rules.
Security & Compliance	SentinelOne EDR; Bitdefender; Qualys vulnerability management; SIEM deployment; incident response; malware defense; SOC 2 and HIPAA audit support; security policies; technical control documentation.
Customer Experience & Collaboration	Customer-facing technical support; de-escalation; remote desktop support; phone, chat and email support; executive/stakeholder communication; technical coaching; troubleshooting guides; hybrid/AV support exposure.

PROFESSIONAL EXPERIENCE

IT SECURITY ANALYST | Mar 2023 – May 2025

CloudKettle Inc. | Halifax, Nova Scotia, Canada

- Owned security-focused IT operations and controls in a Google Workspace environment, supporting employee access, endpoint security, SaaS administration, and secure connectivity.
- Administered and maintained endpoint protection and vulnerability management workflows using SentinelOne and Qualys; reviewed findings, coordinated remediation, and supported incident response.
- Supported SOC 2 and HIPAA audit readiness by developing and maintaining technical documentation and helping enforce security controls across corporate systems.
- Managed Qualys vulnerability scanning, reviewed penetration-test findings, and coordinated remediation of critical risks with relevant teams.
- Helped lead modernization of endpoint security by migrating corporate endpoints from Bitdefender to SentinelOne; the existing resume records a 40% improvement in threat detection.
- Contributed to IT transitions and security improvements, including migration from LastPass to 1Password and NordLayer to Zscaler.
- Provided technical guidance and coordination across IT/security workstreams, communicating risks, status, and next steps to stakeholders.

IT COORDINATOR | Nov 2020 – Mar 2023

CloudKettle Inc. | Halifax, Nova Scotia, Canada

- Coordinated day-to-day IT operations and served as a primary point of ownership for employee technology, workplace systems, endpoint management, and access administration.
- Led the rollout and administration of Jamf for macOS/iOS devices, including device setup, configuration, application deployment, patching, and security/compliance controls.
- Managed user lifecycle activities across Google Workspace, Slack, and related SaaS applications, including onboarding/offboarding, account permissions, and application integrations.

- Provided hands-on technical support for hardware/software issues, macOS endpoints, remote access, VPN, LAN/Wi-Fi, DNS/DHCP, and workplace applications.
- Managed FortiGate firewall rules and UniFi network infrastructure, including wireless security/PPSK deployment and connectivity troubleshooting for remote and on-site employees.
- Coordinated work across IT colleagues and cross-functional stakeholders, delegated tasks, provided technical guidance, and followed issues through to resolution.
- Supported asset and access administration and maintained documentation for operational processes and security controls.
- Supported technology continuity and systems integration during a company acquisition, including security asset review and transition into the parent company's ecosystem.

TECHNICAL SUPPORT CONSULTANT | Nov 2017 – Nov 2020

Rogers Communications | Canada

- Delivered customer-facing technical support for hardware, software, internet connectivity, VPNs, and digital products across phone, online chat, and email.
- Managed the Customer Follow-up ticket queue and acted as an escalation point for complex or long-running cases, using root-cause analysis to drive resolution.
- Provided floor support and mentoring for new hires, sharing troubleshooting techniques and developing support guides for remote desktop support.
- Explained technical steps clearly to customers, documented interactions and outcomes, and followed up on unresolved issues while balancing service quality and timely resolution.

SELECTED TECHNICAL PROJECTS

SIEM Implementation: Led full-cycle deployment of a Security Information and Event Management solution on Dell PowerEdge servers to support centralized security monitoring and threat detection.

Endpoint Security Migration: Led migration from Bitdefender to SentinelOne across corporate endpoints; the existing resume records a 40% improvement in threat detection.

Post-Acquisition IT Integration: Served as a primary technical lead for IT transition and systems integration following an acquisition, helping maintain infrastructure continuity, audit security assets, and integrate global IT operations into the parent firm's environment.

Physical Security Integration: Installed and managed the Kantech Access Control System, integrating physical access processes with internal IT security practices and maintaining user credentials.

Identity & Secure Access Modernization: Contributed to transitions from LastPass to 1Password and from NordLayer to Zscaler to modernize password management and secure remote access.

EDUCATION

Master of Engineering (Internetworking) | Dalhousie University, Halifax, Nova Scotia, Canada

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC) | GIAC Foundational Cybersecurity Technologies (GFACT)
