PROFESSIONAL SUMMARY

IT operations and technical support professional with 7+ years of experience supporting enterprise users, managing endpoint and workplace technology, resolving escalations, and improving day-to-day IT services. Hands-on experience with macOS/iOS device management through Jamf, endpoint security, user lifecycle management, network/VPN troubleshooting, and enterprise application administration. Experienced in leading IT work, coaching colleagues, coordinating incident resolution, and communicating technical issues to stakeholders. Focused on responsive, high-quality employee support and reliable workplace technology.

CORE SKILLS

Employee & Technical Support	Enterprise end-user support; macOS and iOS/iPadOS troubleshooting; hardware/software diagnosis; remote and on-site support; customer de-escalation; L2/L3 escalations
Operations & Team Leadership	Daily IT operations; work prioritization and delegation; team guidance and floor support; ticket queue coordination; incident follow-up; knowledge documentation
Apple & Endpoint Management	Jamf Pro/Jamf Now; macOS/iOS device enrollment and configuration; application deployment; configuration profiles; patching; endpoint compliance; Apple device support
Service Management & Workplace IT	ServiceNow/ticket lifecycle; incident categorization and tracking; SLA awareness; onboarding/offboarding; asset and access administration; vendor coordination
Enterprise Infrastructure	Google Workspace; Microsoft 365; Slack; Active Directory; SSO; VPN; DNS/DHCP; FortiGate; UniFi; Zscaler; 802.1X/PPSK wireless
Security & Compliance	SentinelOne EDR; Qualys vulnerability management; SIEM; incident response; SOC 2 and HIPAA audit support; security policies and technical documentation

PROFESSIONAL EXPERIENCE

IT COORDINATOR / IT SECURITY ANALYST | Nov 2020 – May 2025

CloudKettle Inc. | *Halifax, Nova Scotia, Canada*

- Owned day-to-day IT operations for a distributed organization, supporting employee technology, access, endpoint management, enterprise applications, and secure connectivity.
- Led and coordinated IT work across team members and cross-functional stakeholders; delegated tasks, provided technical guidance, and tracked work through to resolution.
- Managed Jamf-based management and rollout of macOS/iOS endpoints, including device configuration, application deployment, security controls, patching, and compliance practices.
- Acted as an escalation point for complex hardware, software, access, endpoint, and network issues; investigated root causes and coordinated resolution with relevant teams and vendors.
- Administered Google Workspace, Slack, Microsoft 365 and related integrations, including user lifecycle processes, onboarding/offboarding, access permissions, and security policies.
- Managed endpoint security and vulnerability workflows using SentinelOne and Qualys; reviewed findings, coordinated remediation, and supported incident response.
- Supported SOC 2 and HIPAA audit readiness by maintaining technical documentation and helping enforce security controls across workplace systems.
- Led or supported technology transitions, including LastPass to 1Password and NordLayer to Zscaler, helping maintain continuity while modernizing services.
- Managed FortiGate firewall rules and UniFi wireless/network security, troubleshooting connectivity across remote and on-site users.

TECHNICAL SUPPORT CONSULTANT | Nov 2017 – Nov 2020

Rogers Communications | *Canada*

- Delivered customer-facing technical support for hardware, software, internet connectivity, VPNs, and digital services, guiding users through clear troubleshooting steps.
- Served as an escalation point for complex and long-running cases, managing the Customer Follow-up queue and performing root-cause analysis to drive resolution.
- Provided floor support, coaching, and practical troubleshooting guidance to new hires and colleagues; developed support notes and troubleshooting guides.

- Recorded customer interactions and case outcomes, followed up on unresolved issues, and balanced service quality with timely resolution across phone, chat, and email.

SELECTED TECHNICAL PROJECTS

Endpoint Security Modernization: Led the migration from Bitdefender to SentinelOne across corporate endpoints; the resume's reported outcome was a 40% improvement in threat detection.

SIEM Deployment: Led deployment of a SIEM solution on Dell PowerEdge servers to support centralized security monitoring and threat detection.

IT Integration & Continuity: Served as a primary technical lead during post-acquisition IT transition work, coordinating systems integration, security asset review, and infrastructure continuity.

Access Control: Installed and managed the Kantech access control system and maintained user credentials in line with internal security practices.

EDUCATION & CERTIFICATIONS

Master of Engineering (Internetworking) | Dalhousie University, Halifax, Nova Scotia, Canada

ISC2 Certified in Cybersecurity (CC) | GIAC Foundational Cybersecurity Technologies (GFACT)
