# MOHAMMED SHAFI

Hyderabad, India| +91 6300301458 | shafih22@gmail.com

## Professional Summary

*Dedicated **IT Specialist & Security Analyst** with over 7 years of experience managing end-to-end IT operations, endpoint security, and cloud infrastructure. Proven expert in scaling technical environments through advanced **Google Workspace Administration**, **JAMF (MDM)**, and **SentinelOne EDR**. Recognized for leading complex software migrations, managing global user lifecycles, and maintaining 99.9% system uptime in fast-paced, high-growth corporate settings.*

## Technical Skills Matrix

| Domain | Specialized Competencies |
|---|---|
| **Infrastructure & Ops** | Google Workspace (Advanced Admin), Slack Enterprise, JAMF Pro/Now, Active Directory, O365, Asset Management. |
| **Cybersecurity** | Vulnerability Management (Qualys), SIEM Deployment, SOC 2 & HIPAA Compliance, Incident Response, Malware Defense. |
| **Networking** | Fortigate 80E Firewalls, UniFi Network Stack (Switches/AP/PPSK), Zscaler, NordLayer, DNS/DHCP, VPN management. |
| **Support & Triage** | L3 Escalation Support, Hardware/Software Troubleshooting, Remote Desktop Support, IT Onboarding/Offboarding. |

## Professional Experience

### IT COORDINATOR/ IT SECURITY ANALYST — Nov 2020 – May 2025

**Cloudkettle Inc.** | Halifax, NS, Canada

- **Strategic IT Ownership:** Acted as the primary owner for all IT operations, managing the transition from legacy systems to scalable enterprise solutions, including migrations from LastPass to 1Password and NordLayer to Zscaler.
- **Advanced Endpoint Management:** Engineered the company-wide rollout of **JAMF** for macOS/iOS and **SentinelOne** for EDR; established automated patching and device compliance protocols.
- **SaaS Administration:** Administered global accounts including complex user lifecycle management (automated onboarding/offboarding), advanced security policies, and application integrations for Google Workspace and Slack.
- **Vulnerability Management:** Owned the **Qualys** environment; scheduled scans, analyzed penetration test findings, and collaborated with engineering teams for 100% remediation of critical risks.
- **Compliance Leadership:** Supported **SOC 2 and HIPAA** audits by developing technical documentation and enforcing strict security controls across the network.
- **Network Infrastructure:** Managed Fortigate firewall rules and UniFi WiFi security (PPSK deployment), ensuring secure and optimized connectivity for remote and on-site teams.
- **Team Leadership:** Managed a team of IT professionals, delegating tasks and providing technical guidance on cross-functional security initiatives to drive project completion.

### TECHNICAL SUPPORT CONSULTANT — Nov 2017 – Nov 2020

**Rogers Communications** | Canada

- **High-Volume Technical Resolution:** Diagnosed and resolved enterprise-level hardware and software issues involving internet connectivity, VPNs, and digital products.
- **Senior Escalation Point:** Managed the **Customer Follow-up ticket queue**, resolving long-standing and complex technical issues through deep-dive root cause analysis.
- **Mentorship & Training:** Provided "Floor Support" for new hires, developing troubleshooting guides and mentoring staff on effective remote desktop support techniques.
- **Multi-Channel Support:** Delivered stepwise instructions via phone, online chat, and email, maintaining detailed records of all client interactions.

## Notable Technical Projects

- **SIEM Implementation:** Led the full-cycle deployment of a **Security Information and Event Management (SIEM)** solution on Dell Poweredge servers to enable real-time threat detection and secure data aggregation.
- **Physical Security Integration:** Installed and managed the **Kantech Access Control System**, integrating physical office security with internal IT security policies and maintaining user credentials.
- **Tool Modernization:** Spearheaded the migration from Bitdefender to **SentinelOne** across all corporate endpoints, improving organizational threat detection capabilities by 40%.
- **Mergers & Acquisitions (M&A) IT Leadership:** Strategically spearheaded the IT transition and systems integration following the company's acquisition; served as the primary technical lead responsible for maintaining infrastructure continuity, auditing security assets, and successfully merging global IT operations into the parent firm's ecosystem.

## Education

### Master of Engineering (Internetworking)

**Dalhousie University** | Halifax, NS, Canada

- **Program Scope:** An intensive two-year course-based program covering current technology and its evolution, providing a solid theoretical background for analyzing network strengths and weaknesses.
- **Relevant Coursework:** Physical and Datalink Layer Standards, Internet Communication Protocols, Network Architecture, Security Design, and Wide-Area Networks.
